Programming Proficiency: C++, C, Python, Java, JavaScript, HTML, CSS, SQL

Tools & Technologies: Word, Excel, PowerPoint, Git, GitHub, Visual Studio Code, Power BI

Web Development: Frontend Development, Responsive Web Design, REST APIs, UI/UX Design

WORK EXPERIENCE

La Moda Furniture

Chicago, Illinois

IT & Web Development

July 2024 – Present

- Designed and developed a responsive website to improve online customer accessibility and digital presence.
- Collaborated with business operations to support technology-driven solutions and improve workflow.
- Organized digital product information to support efficient inventory presentation while scaling website updates.
- Performed debugging and frontend optimization to improve usability and cross-browser compatibility.

PROJECTS

• Dhikr Connect (iOS App) | *Swift, SwiftUI, CoreLocation, REST*

- Integrated Quran API to provide users access to all 114 Surahs with Arabic text and English translations, featuring smooth transitions and elegant typography with custom Arabic font rendering
- Integrated CoreLocation and CoreMotion to power a real-time animated compass that accurately points toward the Kaaba in Mecca, enhancing the prayer experience.
- Implemented an AI-powered assistant to answer faith-related questions and provide contextual Islamic guidance, leveraging modern NLP APIs for seamless integration.
- Developed real-time prayer countdown system handling 5 daily prayers **across 200+ countries** with **<100ms refresh rate**.
- Created **8+ interactive features** including Zakat calculator, Qibla compass **with $\pm 1^\circ$ accuracy**, and daily Hadith selections.

• ClearEarthVR (GitHub) | *Unity, C#, VR Development*

- Developed and integrated interactive C# scripts to support core VR gameplay mechanics with real-time interactions.
- Implemented and configured immersive audio systems to enhance environmental realism and user engagement in the VR experience.
- Assisted in debugging and optimizing gameplay scripts to improve application stability and performance across VR environments.
- Collaborated with team members using Git and version control workflows to manage project updates and feature integration

• Media Framing of Palestine (GitHub) | *Python, Pandas, NLP, Jupyter*

- Collaborated with a team using Git workflows contributing data cleaning pipes, model development and final project presentation.
- Conducted exploratory data analysis on different news headlines using the GDELT dataset to identify patterns in media coverage across different countries.
- Applied NLP techniques including sentiment analysis with TF-IDF vectorization to quantify framing and tone across media outlets over time.
- Built ML classification models to detect and categorize framing patterns.
- Produces interactive HTML reports and jupyter notebooks visualizing the trends in media framing.

LEADERSHIP

Muslim Student Association | *Executive Board Member*

- Took on a role of guidance and service including organizing Friday Prayers.
- Hosted events such as Ramadan Iftars, managing budget and funding for MSA activities which increased participation **by 25%**.
